

Go2mobile Datasheet

There are two options:

HTTP to SMS which allows you to:

- Text your customers, prospects and employees with news, results, contact information, sales leads, or service calls by running a web command from your application to send a text message to one or more recipients.

SMS to HTTP which allows you to:

- Update your CRM system via inbound text messages from colleagues/customers/prospects by calling a dedicated HTTP Post command setup specifically for your requirement.

HTTPtext - What You Get:

- High speed message delivery
- Online message tracking and archive search facility via our Member Zone*
- Premium telephone, email and fax support as standard
- Full back-up systems in place for peace of mind
- 24/7 monitoring of all systems

HTTPtext System Requirements:

Go2mobile host and manage the advanced infrastructure for you. All you need is a normal internet connection to send your text messages.

Key Benefits:

- Easy Implementation
- Plug and Play – We can have you up and running within 48 hours
- You benefit from new Go2mobile services as they develop

Go2mobile was the first company to offer corporate mobile messaging in Ireland and heavily invests in Research and Development, which ensures your company is continuously kept up to date with mobile technologies.
