

## Go2mobile Datasheet

Interactivetext is a service with two primary functions, namely broadcasting text messages to groups and receiving messages into an online inbox where they can be actioned.

### **Interactivetext features include:**

- Allowing you to send messages at specific times to one or more groups.
- Plan and review messaging schedules.
- Send to Individual Recipients.
- Inbound management facility, which allows messages to be clearly displayed in real-time.
- Archive facility, which can be reviewed at anytime.
- Capture facility, which allows mobile numbers within the online inbox to be saved to groups.
- Keyword/Buzzword facility, which makes the filtering of inbound data extremely easy.
- Conversation-thread feature, which allows entire text conversations between yourself and the recipient to be reconstructed.
- Automated Unsubscribe facility.
- Inbound data can be e-mailed to you in a comma delimited text format.
- Online real time message tracking and archive search facility.

### **Interactivetext - What You Get:**

- Go2mobile Interactivetext is the most advanced mobile messaging service available.
- Global network coverage, over 700 networks in over 200 countries
- Independence- access the system on any machine, in any location at anytime- will work on Apple, Linux and MS Operating Systems.
- Excellent Telephone, email and Fax support as standard
- Full backup systems in place for peace of mind
- 24/7 monitoring of all systems

### **Interactivetext System Requirements:**

Go2mobile host and manage the advanced infrastructure for you. All you need is a normal internet connection and a web browser to build your Groups, send your text messages and view your inbound text messages.

### **Key Go2mobile Benefits:**

- Easy Implementation
- Plug and Play – We can have you up and running within 48 hours

Go2mobile was the first company to offer corporate mobile messaging in Ireland and the UK. We have invested heavily in research and development, which ensures that your company is continuously kept up to date with mobile technologies.
