

Go2mobile Datasheet

In-house Monitoring using Monitor+

Go2mobile operates a complete mobile alert service which allows your current systems' monitoring and reporting software to send mobile alerts directly to the mobile device of the support team or management team.

This service operates 24 hours per day, 365 days per year.

Your current monitoring and reporting software will already be generating normal PC-based email alerts when systems fail, run low on resources, or generate a status report. With Monitor+, you can quickly and easily mobile-enable your standard alerts.

Monitor+ - What You Get:

- High speed message delivery
- Message Priority
- Online message tracking and archive search facility via our Member Zone
- Full Delivery receipts available within Online message tracking
- Reply Functionality: Allows the recipient to text a reply back to the email sender, which can then be logged into the ticketing system.
- Premium telephone, email and fax support as standard
- Full back-up systems in place for peace of mind
- 24/7 monitoring of all systems

Key Benefits:

- Easy implementation
- Plug & Play – We can have your systems mobile-enabled within 24 hours
- You benefit from new Go2mobile services as they develop

Go2mobile was the first company to offer corporate mobile messaging, and we have invested heavily in research and development, which ensures that your company is continuously kept up to date with mobile technologies.

Clients using Monitor+

Clients include Alcatel-Lucent (Worldwide), HP (Worldwide), Mater Hospital, Element Six, Data Electronics, Bank of Scotland and Mentor Graphics.
